

Summer Heat

DON'T LEAVE PETS IN THE CAR

Windows

A car may overheat even when the windows have been left open an inch or two.

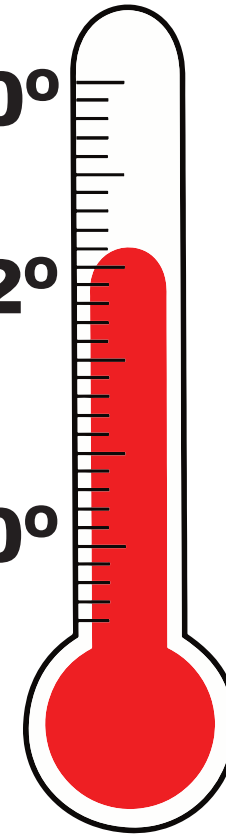

Shade

Shade offers little protection on a hot day and moves with the sun.

Danger

It is a criminal offense to leave an animal unattended in a motor vehicle or under dangerous conditions, which includes hot days. Your car could be damaged or you may face charges.

Within 30 minutes, the car's interior can climb from 85° to 120°.

On an 85° day, it takes only ten minutes for the inside of your car to reach 102°.

Even if the temperature outside is only 70, the inside of your car may be as much as 20 degrees hotter!

Get Help

If you see an animal in a car on a hot day, you may try to locate the owner, or just call 911! Stay by the car till help arrives.

Risk

Pets at most risk for overheating are young, elderly or overweight animals, those with short muzzles and those with thick or dark-colored coats.

Treat your best friend with respect and love!
